all'ambiente. I nostri investimenti nella tecnologia e nella formazione, ci hanno consentito di mettere a punto un ciclo produttivo all'avanguardia, con gestione completamente integrata.

Disponiamo di impianti di collaudo ad elio, di un impianto di galvanostegia, di vari centri di lavoro a controllo numerico, di un impianto di verniciatura alle polveri, di forni di brasatura, di impianti di saldatura e molto altro ancora. Ci impegniamo nella produzione di soluzioni per sistemi che richiedono elevate prestazioni e lunghi cicli di vita, senza trascurare lo sviluppo di componenti che utilizzano refrigeranti naturali, ecocompatibili ed a basso impatto ambientale.

30 years of experience, 8,500 sq m of floor space, over 1 million valves and over 300,000 vessels manufactured each year: DENALINE has the figures, know-how and technology you'd expect from a true leader.

Based in Pordenone, in Italy's Northeast, this is where we manufacture, quality-control and test our products, which are then distributed worldwide. The excellent quality/service/price ratio - which comes with responsible, considered choices - has allowed us to gain a strong foothold in important markets, with foreign sales accounting for 80% of our total.

We are a leading name in Europe and recognized as such in our target market by virtue of our focus on quality, safety and the environment.

Our investments in technology and training have allowed us to develop a cutting-edge production cycle, featuring fully integrated management.

We have helium testing systems, an electroplating system, various NC machining centres, a powder coating plant, brazing furnaces, welding systems, and the list goes on...

We are committed to producing solutions for systems that demand high performance and lengthy life cycles, while also developing components that use natural environmentally friendly refrigerants with little environmental impact.

30 Anni di esperienza, 8.500 mq di superficie coperta, più di 1 milione di rubinetti e oltre 300.000 ricevitori prodotti all'anno: denaline ha i numeri, il know-how e la tecnologia di un vero leader.

Realizziamo a Pordenone, nel nord est d'italia, i nostri prodotti controllati, collaudati e distribuiti in tutto il mondo.

L'ottimo rapporto qualità/servizio/prezzo, derivato da scelte responsabili e attente, ci ha permesso di conquistare mercati importanti, per un fatturato estero che raggiunge l'80% del totale.

La nostra azienda è leader in Europa e come tale riconosciuta nel suo mercato di riferimento, perché attenta alla qualità, alla sicurezza e

sicurezza e qualità e idonei anche ai refrigeranti ecocompatibili (anidride carbonica – ciclo subcritico e transcritico, ammoniaca e idrocarburi).

Our efficient R&D department is always busy working on highly effective products that offer original, exclusive features, coming up with solutions for a whole host of different applications: industrial and commercial refrigeration, temperature-controlled transport, railway and marine applications, air-conditioning systems, and systems designed for specific sectors. Over the years, we have developed many exclusive, patent-protected products in-house. We manufacture both vertical and horizontal liquid vessels, vessel parts, weld-on valves, liquid separators, silencers, stainless steel and cast iron valves of various kinds, fittings, unions, level and moisture indicators, drying filters, etc.. All parts come with the highest levels of quality and safety guaranteed and certified and are also compatible with environmentally friendly refrigerants (carbon dioxide - subcritical and transcritical cycles - ammonia and hydrocarbons).

Attraverso un efficiente e attivo servizio di ricerca e sviluppo, offriamo una produzione caratterizzata da originalità, esclusività ed efficacia, per una gamma di applicazioni quanto mai ampia: refrigerazione industriale e commerciale, trasporti a temperatura controllata, applicazioni ferroviarie e marine, impianti di condizionamento, sistemi progettati per settori specifici. Nel corso degli anni, abbiamo messo a punto all'interno dell'azienda molti prodotti esclusivi e coperti da brevetto. Produciamo ricevitori di liquido, verticali e orizzontali, particolari per ricevitori, rubinetti a saldare, separatori di liquido, silenziatori, rubinetti di vari tipi in acciaio e ghisa, attacchi, raccordi, indicatori di livello e umidità, filtri disidratatori ecc., tutti garantiti e certificati per la massima

Stiamo altresì estendendo la nostra gamma con una serie di nuovi prodotti, realizzati in alluminio, acciai speciali e rame, che utilizzano refrigeranti sia artificiali che naturali, quali: separatori d'olio fino a 450lt, valvole by-pass, valvole di sicurezza, valvole a tre vie, indicatori di liquido/gas per sensori elettronici, ricevitori in alluminio, valvole con attacchi in rame e collettori in rame.

We are also extending our range with a series of new products, made from aluminium, special steels and copper, that use both artificial and natural refrigerants, such as: oil separators up to 450l, bypass valves, safety valves, 3-way valves, liquid/gas indicators for electronic sensors, aluminium vessels, valves with copper fittings and copper manifolds.

and custom design**

Oltre alla produzione corrente, offriamo la creazione di prototipi su specifiche richieste del cliente e in tempi rapidi; l'elevato livello di servizio/qualità è garantito non solo dalle risorse interne qualificate e continuamente aggiornate, ma anche da fornitori ormai storici e da società esterne che realizzano le simulazioni e le analisi dei nostri prodotti.

Mettiamo a disposizione uno staff di tecnici esperti e altamente qualificati, in grado di concepire le soluzioni più idonee, con un vero servizio personalizzato e professionale: come un vero e proprio ufficio tecnico del cliente, presso di noi.

In addition to our current range, we can give you a fast turnaround on prototypes tailored to your specific requirements. The high level of service/quality is guaranteed not only by our own qualified human resources who receive regular retraining, but also by our long-standing suppliers and independent companies running simulations and analyses on our products.

Our team of highly qualified expert engineers is here to help, coming up with solutions that best cater to your needs as part of a truly bespoke professional service: like having your very own technical department at our place.

**La qualità certificata
di un'azienda italiana
protagonista nel mondo**
**The certified quality
of a world-leading
italian company**

La rispondenza alle principali normative internazionali, è un requisito fondamentale per un'azienda ai primi posti nel mercato mondiale. I nostri prodotti sono in conformità con le norme UNI EN ISO 9001:2008, con la direttiva europea 97/23/EC (Pressure Equipment Directive) e con gli Standards UL. Sempre all'avanguardia, ci trovate alle fiere e manifestazioni del settore in Italia e all'estero (Mostra Convegno Expoconfort, Chillventa, China Refrigeration) con la più avanzata tecnologia italiana e la nostra passione sempreverde per l'eccellenza, in ogni aspetto del nostro lavoro.

Being in line with the main international standards is an essential requirement for a company ranking amongst the top players in the world market.

Our products meet the requirements of standard UNI EN ISO 9001:2008, European Directive 97/23/EC (Pressure Equipment Directive) and UL standards.

Consistently at the cutting edge, we take part in trade shows and exhibitions in Italy and abroad (Mostra Convegno Expocomfort, Chillventa, China Refrigeration), showcasing the most advanced Italian technology and our evergreen passion for excellence in every aspect of our work.

Issue Date: 2012-JULY-13

Issued to: DENA LINE SPA
VIA SEGALUZZA 11/B
33170 PORDENONE, PN ITALY

This is to certify that
representative samples of

Valves, Refrigerant
Refrigerant Shutoff Valves, Models E19, E22, Q20, Q22,
Q30, Q35, Q45.

Have been investigated by UL in accordance with the
Standard(s) indicated on this Certificate.

Standard(s) for Safety: ANSI/UL 207, "Refrigerant-Containing Components and
Accessories, Nonelectrical" and CSA-C22.2 No. 140.3,
"Refrigerant-Containing Components for Use in Electrical
Equipment."

Additional Information: See the UL Online Certifications Directory at
www.ul.com/database for additional information

Only those products bearing the UL Listing Mark for the US and Canada should be considered as
being covered by UL's Listing and Follow-Up Service meeting the appropriate requirements for US
and Canada.

The UL Listing Mark for the US and Canada generally includes: the UL in a circle symbol with "C" and
"US" identifiers;  the word "LISTED"; a control number (may be alphanumeric) assigned by UL;
and the product category name (product identifier) as indicated in the appropriate UL Directory.

Look for the UL Listing Mark on the product.

COLORE Colour BLACK RAL 9005
RESISTENZA ALLA CORROSIONE IN NEBBIA SALINA DI 250 ORE SECONDO NORMA ASTM-B117. RESISTENZA FINO A 1000 ORE SU RICHIESTA ASTM-B117. 1000 hours resistance on salt spray at 250 hours according standard

FILTRI DISIDRATORI A SETACCIO MOLECOLARE E ATTACCHI SAE - Molecular sieve filter drier with SAE connections

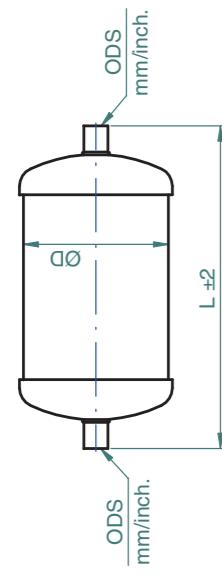

- According to ARI STANDARD 710-S6
Tc: condensing temperature +30 °C
Te: evaporating temperature -15 °C
Δp: charge with a drop pressure of 0,07 bar

- Drying capacity is based on following moisture contents in the refrigerants before and after drying:
-R22 from 1050 PPM W to 60 PPM W
-R134a from 1050 PPM W to 75 PPM W
-R404A / R407C / R507 from 1020 PPM W to 30 PPM W
-R410A from 1050 PPM W to 60 PPM W

INFORMAZIONI GENERALI RELATIVE A RUBINETTI TIPO ROTALOCK - RUBINETTI FLANGIATI - RUBINETTI A SALDARE - RUBINETTI VERTICALI - PER FLUIDI REFRIGERANTI DEL GRUPPO 1 E 2 DELLA PED

General information relatives to Rotalock Valves - Flanged Valves - Soldering Valves - Vertical Valves - For Refrigerant Fluid Group 1 and 2 PED

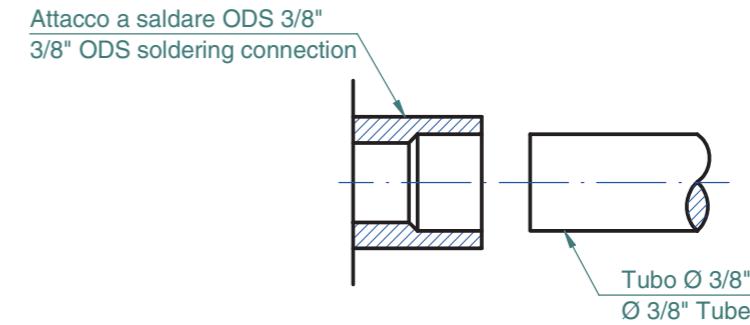

(I) La Dena Line è in grado di fornire rubinetti nel campo della refrigerazione e condizionamento sia ad avvitare con attacchi Rotalock da 3/4" a 2 1/4" sia a saldare su ricevitori di liquido o compressori ermetici. Tutti i rubinetti DENA LINE sono dotati di una speciale guarnizione in grado di resistere al calore sino a 1000°C. Dopo la brasatura in forno, tutti i rubinetti e raccordi sono controllati per verificare l'assenza di difetti; i rubinetti e raccordi finiti sono quindi collaudati a 40 Bar per la perfetta tenuta a pressione. Le eventuali prese di pressione o BY-PASS sono fornite con tappi in acciaio stampato. Tutti i rubinetti DENA LINE sono protetti contro l'ossidazione e possono essere forniti con un trattamento superficiale di **nicchelatura, stagnatura o ramatura**. La DENA LINE è in grado di studiare rubinetti che rispondono alle specifiche esigenze dei propri clienti. Le varie filettature dei raccordi dei rubinetti tengono conto delle norme UNF e SAE. Nella seguente tabella vengono indicate le relative corrispondenze.

(GB) Dena Line is able to supply valves for the air conditioning and refrigeration areas, either to be screwed with Rotalock connections from 3/4" to 2 1/4" or to be soldered on to liquid receivers or hermetic compressors. All the valves are equipped with a special gasket meant to resist to a heat of up to 1000°C. Following furnace brazing, each valve is inspected for possible defects. Once completed, the valves are then tested at 40 Bar pressure for a perfect pressure seal. The optional gage ports or BY-PASS are supplied with pressed steel caps. All DENA LINE valves are protected against oxydation and can be delivered with surface treatment as **nickel, copper, and tinned**. If needed, DENA LINE can also design a completely new valve meeting all customers' specific requirements. The various thread of the valves fittings are in accordance with UNF and SAE standards. The tables hereafter shows the correspondences.

| 1 3/4" UN | - | 12 | 44,450 |
| 2 1/4" UN | - | 12 | 57,150 |

(I) Si ricorda che il termine "filettatura SAE" non si intende la caratteristica della filettatura ma unicamente il diametro esterno del tubo impiegato che va collegato all'attacco mediante un bocchettone con opportuna svasatura. Il termine UNF definisce invece le caratteristiche della filettatura ed il diametro esterno della filettatura stessa. Con la sigla ODS si intende un attacco a saldare il cui diametro in pollici o in millimetri si riferisce al diametro esterno del tubo da inserire nell'attacco stesso (vedi esempio).

(GB) We wish to point out that "SAE threadings" doesn't stand for thread specifications but only for the external diameter of the tube used for the connection with the joint, by means of a flared nut. On the opposite, the term "UNF" describes the thread specifications and its outer diameter. The ODS abbreviation stands for a soldering connection whose diameter in inches or millimeters refers to the external diameter of the tube to be plugged into the connection (see example).

GUARNIZIONI PER RACCORDI, RUBINETTI ROTALOCK E VALVOLE IN GHISA
Gaskets for Rotalock connections, Valves, and Ductile Cast Iron Valves

(I) A richiesta, la DENA LINE è in grado di fornire le guarnizioni in PTFE sia a corredo delle valvole sia montate direttamente sui ricevitori di liquido previsti con attacco e valvola. Le misure standard degli anelli in PTFE sono indicate nelle tabelle seguenti:

(GB) Dena Line is able to supply PTFE gaskets either as outfit for valves or mounted on the liquid receivers with connection and valve. Standard dimensions are as follows:

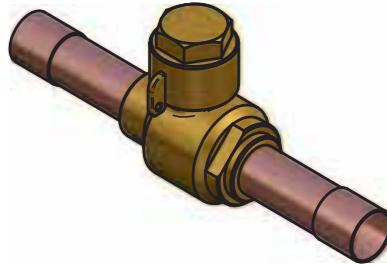

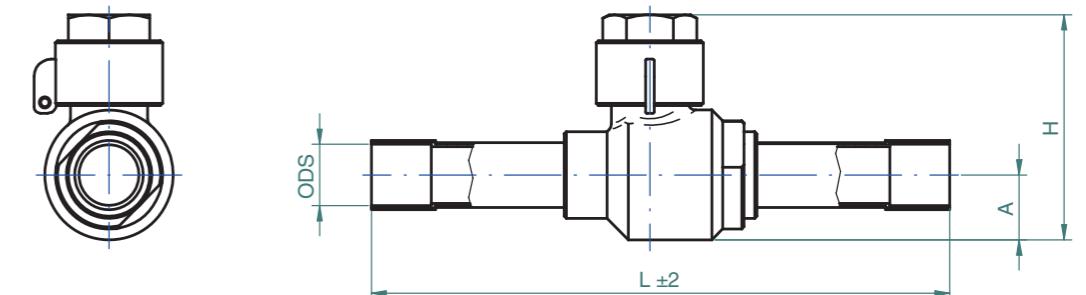

Per Valvole Rotalock
For Rotalock Valves

| ROOTALOCK | Øi mm | Øe mm | Sp. mm | Cod. |
|-----------------|----------|----------|-----------|------------|
| 3/4" - 16 UNF | 11,1 | 14,3 | 1,35 | 2570.001.0 |
| 1" - 14 UNS | 15,7 | 19,1 | 1,35 | 2570.002.0 |
